Java – Day 9: List, Set and HashMap

12 Practice Questions with Java Solutions

List – ArrayList

1. Read and Display Elements Using ArrayList

import java.util.ArrayList;

2. Find the Largest and Smallest Elements in an ArrayList

import java.util.ArrayList;

3. Search for an Element in an ArrayList

import java.util.ArrayList;

4. Remove All Even Numbers from an ArrayList

import java.util.ArrayList;

Set – HashSet

5. Remove Duplicate Elements from an Array Using HashSet

import java.util.HashSet;

6. Find the Common Elements in Two Arrays

import java.util.HashSet;

7. Find the Union of Two Arrays

import java.util.HashSet;

8. Count the Number of Distinct Elements in an Array

import java.util.HashSet;

HashMap – Frequency and Lookup

9. Count the Frequency of Each Number in an Array

```
import java.util.HashMap;
```

10. Count the Frequency of Each Character in a String

```
import java.util.HashMap;
```

11. Find the First Non-Repeating Character in a String

```
import java.util.HashMap;
```

12. Find the Number That Appears Most Frequently

```
import java.util.HashMap;
```
